

Undergraduate Program

The program is aimed at helping students develop basic knowledge in economics and apply their knowledge to understand economic behaviors, to make economic decisions, and to evaluate economic policies. The program provides students with a solid foundation for advanced studies and essential skills for a wide variety of career opportunities.

The undergraduate program requires 128 credits for graduation.

1. 28 credits from general education courses.
2. 45 credits of required courses for the major: Principles of Economics, Accounting, Calculus, Introduction to Computer, Microeconomics, Macroeconomics, Statistics, Econometrics, International Finance, and International Trade.
3. 30 credits of elective courses related to economics profession: all the courses provided by the department and some specific courses supported by other Departments including Commercial Law, Chinese Economic History, Financial Management, and Linear Algebra.
4. 25 credits of free elective courses. The department offers interdisciplinary programs, covering Financial Economics, Managerial Economics, International Political Economics, and Mathematical Economics.
