

Ph.D. Program

The Ph.D. program provides students with rigorous theoretical and analytical training. The doctoral students will acquire knowledge in advanced economic theory and quantitative methods through course work and develop abilities to conduct independent research through dissertation work, both attributes necessary for successful academic or research careers. In particular, our doctoral program is aimed at training our students to be competent and outstanding in both teaching and research in order to compete well with other doctoral programs in economics in Taiwan.

The Ph.D. program requires 40 credits for graduation.

1. 15 credits from required courses: Microeconomic Theory (II), Macroeconomic Theory (II), Econometrics (II), International Trade (II), International Finance (II).
2. 4 credits from selective required courses: Seminar on the Topics of International Economics (I) and (II).
3. 21 credits from elective courses.
4. Fields of concentration: International Finance and Monetary Economics, International Trade and Industrial Economics, Econometrics.
